OFFICE & DENTAL STUDIO

LORDS DENTAL STUDIO

ASHWAUBENON, WI

The new facility replaced an aging structure that was inefficient, cramped, and had very poor interior environmental conditions.

Lords Dental Studio artists offer a complete line of dental restoration products, including dental implants, dental crowns, dental bridges, and more.

Today, more than half the management team owns part of the company. Abacus Architects, Inc. worked with each management team in order to create a plan that:

- increased work flow
- created better interior air quality
- created a fun work place
- allowed room for expansion
- integrated dental technology into the plan

Abacus helped create a perfect model of efficiency that is helping Lords Dental Studio make a difference in dental practice.

Project Stats:

- Corporate Office and Dental Studio
- 29,582 square feet
- \$3.6 Million
- Completed 2005
