

GAS STATION/CONVENIENCE STORE

MARSHALL'S GATEWAY

GLENBEULAH, WI

We were hired by Conventure Corporation to help develop a new prototype for the Marshall's Convenience Store chain. This was the first building with their new design. We worked closely with the owner and Citgo to take all their knowledge of gas stations and convenience stores and incorporate it into one design. The design has been successful and will soon be incorporated into many of their other stores.

Glenbeulah did not have a gas station or convenience store before, so this project was very important to the members of this community.

Some of the features in the new design are an internet café, large gourmet coffee bar, small food court with tables, and a walk-in beer cooler.

Project Stats:

- New gas station, convenience store, Laundromat, and office
- 5,844 sq. ft.
- \$450,000
- Completed October 2006
