# HIGH SCHOOL REMODEL

**KEWASKUM  
HIGH SCHOOL**

KEWASKUM, WI

Kewaskum High School's objective was to remodel their old gymnasium. Splitting the 15,600-square-foot area, Abacus Architects, Inc. was able to design two unique areas for the school's use.

The first is a library, with its colorful soffits and columns creating a statement. Also included in this space are two computer labs and offices. The space is very warm and inviting to students.

The second space created is an auditorium, complete with a raised stage, stadium seating for 350 people, and dressing rooms. It is an amazing transformation from the old gym that it once was.

**Project Stats:**

- Remodeling of old gymnasium into a library and auditorium
- 15,600-square-foot Remodel
- \$1.3 Million
- Completed September, 2007
