# ELEMENTARY SCHOOL REMODEL

WALWORTH  
ELEMENTARY  
SCHOOL

WALWORTH, WI

This remodel project for Walworth Elementary School may be a small one, but it had a huge impact on the school. The small design change of adding glass and a transaction window to the main office has really helped the security of the school. The administrative offices now have a direct view of the main entrance. When anyone enters the school, administration can see them, and they have to stop at the security “checkpoint” window.

It is nice for the offices to be open to the main corridor of the school, making them a part of the school’s daily life. The office now gets natural light from the main entrance that it didn’t have before the renovation. It also got a face lift with new carpet and furniture. Overall, this small change was a big success for Walworth Elementary.

**Project Stats:**

- Remodeling of Administration Office
- 980-square-foot Remodel
- \$72,600
- Completed August, 2006
